## TABLE OF CONTENTS

The 2015-2019 Capital Improvement Program .....	1
2015 CIP – Major Components & Source of Funds.....	5
2015-2019 CIP - Major Components & Source of Funds .....	7
2015-2019 Programs by Fund Source.....	9

### City of Chicago Programs

<b>Aviation</b> .....	45
-----------------------	----

The Department of Aviation is responsible for the operation and maintenance of both Midway and O'Hare International Airports. The operation and maintenance of both airports necessitates a capital program to rehabilitate aging facilities and infrastructure. Both airports' capital improvement programs include projects that improve runways, taxiways and aprons, terminal buildings, access roadways, and parking lots. Aviation capital funding sources and uses are presented separately from the funding sources and uses for local capital projects. This is done in order to provide a clear picture of the funding sources for, and the distribution of funding amongst, local capital projects that affect basic City infrastructure and neighborhoods. Aviation capital funding is used exclusively for projects at the City's two international airports.

The total 2015-2019 Aviation allocation is \$2,644,712,591.

<b>CitySpace</b> .....	56
------------------------	----

The CitySpace Program coordinates the creation of new open space in neighborhoods with the greatest need for parkland, the acquisition and preservation of existing wetlands, natural resources and river edges and the reuse of railroad infrastructure for trails and parks. The program focus areas are: Downtown, NeighborSpace, Greenways and Neighborhood Parks.

- *Downtown* projects focus on areas such as the Riverwalk.
- *Greenways* are projects that encourage greening and planting efforts that enhance existing natural and cultural resources.
- *NeighborSpace* is a not-for-profit organization founded in 1996 whose mission is to acquire and support small-scale community managed open spaces in Chicago neighborhoods. The organization was established through an intergovernmental agreement between the City of Chicago, Chicago Park District, and the Forest Preserve District of Cook County program that works with community groups to use vacant lots and underutilized areas in order to create open spaces in their neighborhoods.

The total 2015 – 2019 CitySpace allocation is \$44,340,892.

---

---

**Economic Development .....63**

The Economic Development Program includes demolition, industrial streets, landscape, other programs, streetscaping, and viaduct clearance improvements. The majority of these programs are administered by the Department of Transportation in collaboration with the Department of Planning. These city departments work with area businesses, community organizations and other governmental bodies. The goal is to create and retain jobs as well as encourage new investment.

- *The Demolition Program* is designed to safely clear hazardous building sites thus promoting development. The proper disposal of hazardous materials and leveling of unsafe structures is a key component in the City's economic development program and is managed by the Department of Buildings.
- *The Industrial Streets Program* is designed to promote the viability of industrial areas by improving roadway infrastructure and removing hazardous or substandard conditions that hinder the operation of industrial firms. These improvements typically include street reconstruction and or resurfacing.
- *The Other Economic Development Program* encourages economic development projects that involve joint financing with other jurisdictions, such as the federal government, State of Illinois or Chicago Park District, as well as with the private sector. The City also uses its own resources to finance smaller scale developments designed to enhance an area's economic viability.
- *The Streetscaping Program* is designed to improve neighborhood-shopping environments by upgrading the physical appearance of neighborhood business and commercial areas. Improvements may include new sidewalks, curbs, gutters, streetlights, pedestrian lighting, landscaping, and other amenities such as banners, decorative trash receptacles and bike racks.
- *The Viaduct Clearance Program* provides for increased clearance beneath railroad viaducts to enable trucks to pass underneath. This program is designed to provide a network of streets that permit truck access throughout the City. Typically, a vertical clearance is increased by lowering the roadway under and adjacent to the viaduct. Scope of work often includes lowering and or relocation of public and private utilities that are located within the right-of-way.

The total 2015 – 2019 Economic Development is \$215,485,068.

**Lakefront/Shoreline .....73**

The City of Chicago in partnership with the Chicago Parks District and the U.S. Army Corps of Engineers have developed a plan by which the City's shoreline continues to be reconstructed protecting it and other public facilities from erosion and deterioration.

The total 2015-2019 Lakefront/Shoreline allocation is \$99,893,356.

**Municipal Facilities .....74**

Municipal facilities are an essential component of the City's infrastructure, providing space to administer government services and store equipment. The Department of Fleet and Facility Management (2FM) and the user departments are responsible for the maintenance of these facilities. The Department of 2FM is also charged with the responsibility of designing new facilities and modernizing existing buildings. The Municipal Facilities component of the Capital Improvement Program is divided into various subprograms, each with its own specific requirements.

The total 2015-2019 Municipal Facilities allocation is \$74,428,478.

---

## Neighborhood Infrastructure .....78

The Neighborhood Infrastructure capital Improvement program is administered by the Department of Transportation and consists of capital improvements to the local street system of Chicago (residential streets, sidewalks and lighting).

- *Aldermanic Menu* -The total menu allocation to \$1,320,000 per ward, whereby aldermen have the option of selecting capital improvement of streets, alleys, curbs, sidewalks, and traffic calming, depending on their local infrastructure needs. The Menu Option also includes traffic signal modernization, alley lighting, streetlight upgrades and replacement.
- *Alley Construction* provides a new concrete roadway and drainage at previously unimproved (usually dirt) alleys. Alleys are constructed by block. Benefits derived from the program include an improved roadway surface, improved drainage, and increased alley sanitation.
- *Lighting*-The Division of Electrical Operations is responsible for maintaining street lighting on 3,775 miles of residential and arterial streets. The department's capital improvement program includes the improvement of lighting in the public way, replacement of deteriorated street light poles and bases, installation of lighting in viaducts, relamping of street and alley lights, and street light cable replacement. Also, upgrades of the lighting system are occurring as part of other capital projects such as New Street Construction (WPA), Major Streets, and Streetscaping projects.
- The *New Street Construction Program* replaces existing unimproved streets, which include new pavement, curbs and gutters, and upgrade sewer, water, and electrical facilities. Unimproved streets are those without curbs and gutters or a concrete base, and are commonly called “WPA Streets”, since most were built under the Federal Works Program Administration. The benefits of the program include enhancement of appearance of neighborhoods, improved drainage and the elimination of the need for constant maintenance of unimproved streets. This program also installs new streets for CHA plan for transformation developments.
- *Residential Street Resurfacing* upgrades deteriorated local streets by removing the existing roadway surface and replacing it with an overlay of new asphalt. Also included are the adjustment to drainage structures, replacement of curbs and gutters as needed, and installation of ramps at crosswalks. Resurfacing results in a better riding surface, improved drainage and enhancement of the neighborhood’s appearance.
- *Shared Cost Sidewalks* -The Department of Transportation administers the Shared Sidewalk Program to restore deteriorated sidewalks. The City and the property owner each pay towards the construction costs for the needed improvements. When the property owner is a senior citizen, the City pays an even greater share of the construction cost. The City pays for the entire cost of sidewalk replacement at locations for which the City is solely responsible, such as at alleys and crosswalks.
- The *Vaulted Sidewalks Program*, administered by the Department of Transportation, involves filling in dangerously deteriorated vaulted sidewalks. Vaulted sidewalks were installed in some Chicago neighborhoods at the time when streets and sidewalks were raised five to six feet to avoid flooding due to the high water table. Located primarily in the Near Northwest, Near Southwest, Lower West Side, and South Chicago communities, vaulted sidewalks can cave in and create serious obstacles.

The total 2015-2019 Neighborhood Infrastructure allocation is \$580,967,681.

---

---

## Sewer System ..... 98

The Department of Water Management (DWM) is responsible for approximately 4,400 miles of sewers, 225,000 drainage structures and 148,000 manholes citywide. The department's sewer system capital improvement program provides for the replacement of deteriorated or undersized sewers based upon physical inspection, maintenance and repair records, and hydraulic evaluation. Construction costs are about \$5-\$6 million per mile for most sewers. Larger sewers and sewers in the central business district could cost substantially more to reconstruct. Sewer lining and rehabilitation of large diameter sewers are also covered in the Sewer System capital improvement plan.

The total 2015-2019 Sewer System allocation is \$1,197,662,960.

## Transportation ..... 114

The Transportation Capital Improvement Program, administered by the Chicago Department of Transportation (CDOT) consists of capital improvements to the major street systems under the City's jurisdiction and enhancements to the transit systems that serve Chicago.

- *Bridge Improvements*-The Department of Transportation is responsible for 391 bridges and viaducts on the arterial street system. The Bridge capital improvement program maintains these structures in safe operable condition. The benefits of this program are reduced maintenance costs, increased dependability of movable bridges, and improved safety. This program involves repair, rehabilitation, and reconstruction of bridges that carry streets and pedestrian walks.
- *Intersection/Safety Improvements*- CDOT is responsible for maintaining the safe movement of vehicular and pedestrian traffic along the City's 988 miles of arterial streets. In many cases, safety impediments such as narrow intersections and deteriorated railroad crossings cause traffic congestion and safety hazards to the public. The department seeks to remedy these problems by widening intersections to provide turning bays, rehabilitate railroad crossings, and installing new traffic control devices (traffic signals and railroad crossing gates) where necessary.

CDOT is also responsible for new installation and maintenance of crash mitigation devices, as part of its Traffic Safety Program. Crash mitigating devices include the following:

- *Guardrails* – these are installed on the transportation right-of-way for the primary purpose of protecting vehicle occupants or pedestrians in areas where the consequences of a crash would be severe. Lake Shore Drive constitutes the area under the City's jurisdiction where most guardrails are installed and maintained.
  - *Impact attenuators* – these are collapsible cartridge systems and sand barrels that are placed before structure abutments in the transportation right-of-way, such as viaducts and separator walls. Impact attenuators reduce the severity of vehicle crashes into these structures. Bollards, these are concrete filled pipes installed in limited right-of-way areas where personal safety or property damage hazards could result from vehicle crashes.
  - *Major Streets*-The Department of Transportation is responsible for 988 miles of major streets, commonly known as arterial streets. The Major Streets capital improvement program provides for the resurfacing, reconstruction, or widening of these arterial streets. These projects maintain a safe, efficient street system and reduce maintenance costs. Handicapped accessibility ramps, known as ADA ramps are also installed or updated as part of this program.
- 
-

---

---

**Transportation ..... cont'd**

- *Railroad Improvements*-The City of Chicago is working to enhance the rail industry by participating with the Chicago Regional Environmental and Transportation Efficiency Program (CREATE). This is a partnership between the City of Chicago, the U.S. Department of Transportation, the State of Illinois, Metra, Amtrak, and the freight railroads to invest in critically needed improvements to increase the efficiency of the region's passenger and freight rail infrastructure. The goal of CREATE is to:
  - Improve passenger rail service
  - Reduce freight rail congestion to boost regional and national economic competitiveness
  - Reduce motorist delay due to rail conflict at grade crossings
  - Enhance public safety
  - Promote economic development
  - Create and retain jobs
  - Improve air quality
  - Reduce noise from idling or slow-moving trains
- The *Traffic Signal* program includes the design and installation of new traffic signals where none exist as well as modernizing the existing substandard signal, which may also include minor upgrades such as the installation of a left-turn arrow. This program is designed to improve safety to motorists and pedestrians, as well as to improve the traffic flow.
- The *Transit/Bicycle/Pedestrian* program includes the rehabilitation or replacement of select CTA stations, and extensions of other at-grade, subway, and elevated CTA facilities. The goal of the Department's transit capital improvement program is to ensure safe and efficient transit service to the users and to determine the best means of solving transit problems. The program also includes bicycle and pedestrian facilities that provide access to transit or an alternative option to motor vehicle travel for an entire trip.

The total 2015-2019 Transportation allocation is \$1,045,246,096.

**Water .....154**

The Department of Water Management (DWM) is responsible for delivering potable water from pumping stations to the Chicago consumer, as well as to adjacent suburban communities. The department's capital improvement program include maintaining the City's two purification plants, upgrading 12 pumping stations, increasing available water supply by installing new and replacing old grid mains and various appurtenances, and replacing unreliable meters to ensure proper accountability of water use.

The total 2015-2019 Water allocation is \$2,071,811,860.

---

---

## **2015-2019 CAPITAL IMPROVEMENT PROGRAM**

In the continuing effort of “Building a New Chicago”, initiated by Mayor Rahm Emanuel in 2012, the City continues to move forward. The following is an overview of the City of Chicago’s Capital Improvement Program (CIP) for 2015 to 2019, a five year schedule of infrastructure investment that the City plans to make to City infrastructure.

The City’s CIP Program addresses the physical improvement or replacement of City-owned infrastructure and facilities. Capital improvements are projects with long useful lives that maintain, upgrade or replace public infrastructure and public service providing facilities. Each year, the City of Chicago produces a CIP, a spending “blueprint” based upon the most current revenue projections and project priorities. Continued investments in infrastructure and facilities are critical to support and enhance neighborhoods, stimulate the economy and improve services.

Planning for capital improvements is an ongoing process. As the City's infrastructure ages and needs change, capital programs and priorities are adjusted. New construction may be required to accommodate increased demand or replace aging facilities while existing infrastructure requires periodic rehabilitation, replacement or other improvements to protect the City's investment.

The CIP is not intended to be an all-inclusive inventory of the City's capital needs for the upcoming five years. It is a document that outlines planned capital improvements, given the projection of available financial resources. The revenue for the CIP is generated from general obligation bonds; tax increment financing, revenue bonds in the case of Water, Sewer and Aviation improvements; and state and federal funding for transportation improvements. Funding is also provided from private sources that utilize special assessments such as the shared sidewalk program.

### **FINANCIAL OVERVIEW 2015**

The 2015 Capital Improvement Program allocates \$2.4 billion towards the replacement, rehabilitation or expansion of the City of Chicago's infrastructure and public facilities. Bond funds account for 49 percent (\$1.2 billion) of the anticipated revenue. City funds account for 21 percent (\$503 million). Federal sources will finance 17 percent (\$397.9 million). Other funds including private contributions account for 1 percent (\$31 million), State funds are expected to finance 6 percent (\$147 million) and TIF funds are expected to finance 6 percent (\$149 million).

### **FINANCIAL OVERVIEW 2015 - 2019**

The 2015-2019 Capital Improvement Program allocates approximately \$7.9 billion toward the replacement, rehabilitation or expansion of the City of Chicago's infrastructure and public facilities. Bond funds account for 56 percent (\$4.5 billion) of the anticipated revenue. City funds account for 25 percent (\$1.9 billion). Federal sources will finance 11 percent (\$900 million). Other funds including private contributions account for 2 percent (\$135 million),

---

---

State funds are expected to finance 3 percent (\$270 million) and TIF funds are expected to finance 3 percent (\$232 million).

## **CIP PROGRAM & HIGHLIGHTS**

### **2015 Program**

In 2015, the neighborhood and transportation infrastructure sections of the CIP are financed in part with over \$117 million neighborhood capital improvement bonds. This year marks the 20<sup>th</sup> year of the Aldermanic Menu program. Over the years, the menu has been an important component of the City's capital improvement program, funding new streets, sidewalks, alleys, street lighting, and other critical neighborhood infrastructure improvements.

In 2015, the Aldermanic Menu program remains funded at \$1.32 million per ward. The Aldermanic Menu process is a critical piece of the City's neighborhood capital planning efforts that include a more collaborative process for Aldermanic project requests to ensure better coordination with other infrastructure work, focusing on the most pressing capital needs, and a stricter timeline for project selection.

### **2015 Highlights**

Damen/Elston/Fullerton Ave. Project – Reconstruction of this intersection began in 2015 to relieve congestion and improve safety at one of the City's most crash-prone intersections. Construction is scheduled to continue throughout 2016. The project will realign and reconstruct Elston Ave. and its intersections with Damen and Fullerton Avenues to improve safety and reduce congestion in the area.

Wells-Wentworth Connector – is a multi-phase project that will create a new road between the Loop and Chinatown. The realignment of Wentworth Ave., will greatly improve safety for both motorists and pedestrians, while forming better links between New Chinatown and the traditional Chinatown south of Cermak Road.

Oakwood Boulevard (39<sup>th</sup> Street) bridge over Metra and CN Railroad – this structure is located within the historic Burnham Park. The structure, originally built in 1926, will entirely be replaced. The deck width will be increased, and the architectural facade will be replicated. In addition, new sidewalk, lighting and drainage will be installed to current standards.

41<sup>st</sup> Street Pedestrian Bridge over Lake Shore Drive – this will be a brand new structure at this location. The proposed pedestrian bridge is a 2 span inclined arch structure. The bridge will be fully compliant with current ADA standards. The improvements include both architectural and safety lighting and landscaping enhancements. Construction is anticipated to begin Spring 2016 with an 18-month duration providing completion of construction in Fall 2017.

---

## 2015-2019 Program

The \$7.9 billion program addresses the ongoing efforts of the city to maintain city infrastructure, enhance the quality of life as well as support economic development opportunities.

- Cityspace projects total approximately \$44 million over the next five years. Projects include community parks, gardens and school gardens. One of the larger projects is, the Riverwalk:
  - Construction continues on the Chicago Riverwalk project, this project will create a continuous pedestrian path along the south bank of the Main Branch of the Chicago River from State Street to Lake Street. The final phase is currently under construction, and will extend the Riverwalk to Lake Street, with the following three themed sections: The Water Plaza (LaSalle to Wells); the Jetty (Wells to Franklin) and the Boardwalk (Franklin to Lake). It will incorporate recreational, educational, restaurants and other commercial components. It is funded through a loan from the US Department of Transportation Infrastructure Finance Innovation Act Program.
- Economic Development – Over \$104 million in Streetscape projects are planned over the next five years.
- Shoreline: Construction is scheduled to be completed during the Summer of 2016 on the \$37 million shoreline project at Fullerton Avenue will completely replace the failing revetment with new structures. In addition, 5.8 acres of new parkland along the lake will be added. This additional land area will allow the heavily traveled Lakefront Trail to be repositioned to ease congestion at one the busiest parts of the lakefront, notorious for its biker-pedestrian conflicts. In addition, secondary pedestrian trails will meander through the park, providing a much-needed escape valve from the busy Lakefront Trail.
- Sewer and Water projects are managed by the Department of Water Management (DWM), and over the next five years the program totals \$3.3 billion or 42% of the capital plan. In 2012 the City established an aggressive schedule to replace at least 880 miles of water mains, rebuild or reline over 750 miles of sewer mains, reline 140,000 sewer structures, and upgrade four of the original steam powered pumping stations to electricity in the next ten years. These upgrades will ultimately save the City money, create jobs, and protect the health and safety of Chicagoans by ensuring the delivery of clean water today and in the future. These improvements will be funded with revenue from water and sewer fees and with the proceeds from water and sewer revenue bonds.

DWM plans to increase their workload in 2015 by installing 90 miles of new water mains, and 22 miles of new sewer mains; relining 50 miles of sewer mains and installing 17,183 new water meters.

- Transportation projects total \$1.0 billion or 13% of the 5-year plan. Projects include:

Bridge/Viaduct improvements total over \$256 million. Projects under construction in 2015 include:

- Adams Street bridge/viaduct at s branch of Chicago River (Canal to Wacker)
- Cortland Bridge Rehabilitation

Intersection and Major Streets programs total over \$421 million over the next five years. Projects expected to be under construction over the next few years include:

- Lake, Damen to Ashland
- Wells-Wentworth Improvement
- Oak Park/Irving Park Rd. to Forest Preserve Dr.

Transit/Bicycle/Pedestrian programs total over \$278 million through 2019.

Project Highlights include:

- 3 Bike & Pedestrian Bridges over Lake Shore Drive to give Chicagoans better access to the Lakefront. They are at the following locations:
  - 35th Street and LSD - under construction now and when completed, will be the first suspension bridge over LSD.
  - 41<sup>st</sup> Street bridge - will begin in Spring 2016
  - 43rd Street crossing – anticipated construction start of 2017.
- Loop Link – A transportation upgrade on Washington, Madison, Clinton and Canal that will move people more efficiently through the Loop while improving the connection between neighborhoods across Chicago and jobs in our Central Business District. It also, connects the West Loop to Michigan Avenue.
- Navy Pier Flyover (Lakefront Trail #1, #2, #3) - an elevated path for safer walking and biking along the Lakefront Trail near Navy Pier. It will extend from the Chicago River Bridge to Jane Addams Park, providing a safer and scenic alternative to several congested intersections along the Lakefront Trail. The path will also include stairs and ground level entrance and exit points for easy access. It is being constructed in three phases and the expected completion is in 2018.
